Manager Network and Cybersecurity

Descrição da função

Network Infrastructure -

Provide end-to-end support for LAN, WLAN, WAN, and Internet connectivity services, ensuring timely resolution of network-related incidents and service requests
Strong knowledge of Cisco LAN switching and routing (Layer 2 and Layer 3), including practical experience with Cisco Catalyst switches ,routers, wireless controllers/access points, Nexus data-center switching, MDS fabric, routers, ASA firewalls and ISE-related services.
Strong hands-on expertise in TCP/IP, VLANs, STP, EtherChannel, HSRP/VRRP, OSPF, BGP, QoS, DHCP, DNS, NAT, VPN and packet-level troubleshooting.
Analyze network traffic, bandwidth utilization, and performance metrics to optimize availability, reliability, and efficiency.

Working knowledge of Nexus, MDS/SAN switching, Cisco ISE, ASA, ISR/Catalyst 8200 and Meraki environments.

Strong understanding of network-security architecture, segmentation, AAA, 802.1X, RADIUS/TACACS+, firewall policy, secure remote access, certificate fundamentals and identity-based access control.
Install, configure, maintain, and troubleshoot network equipment, including switches, routers, firewalls, wireless controllers, and access points
Design, implement, and enhance network topology, architecture, and infrastructure solutions aligned with business and security requirements.
Ensure network availability, resilience, and security through proactive monitoring, preventive maintenance, and capacity planning

Cybersecurity -

Monitor security events and investigate alerts.
Perform vulnerability assessments and coordinate remediation.
Manage and support firewalls, endpoint security, IDS/IPS, SIEM, and security monitoring tools.
Conduct security reviews and support cybersecurity audits.
Assist in incident response, threat analysis, and root-cause investigations.
Implement security hardening, patching, and compliance controls.
Review and approve security-related service requests.
Support cybersecurity awareness and training initiatives.
Collaborate with infrastructure, application, and business teams to address security risks

Project Management -
