Sustainability Implementation Manager APAC

工作职责

Sustainability Strategy & Program Implementation

- Lead the implementation of regional sustainability initiatives across APAC, including decarbonization, circular economy, responsible sourcing, and responsible business due diligence programs.
- Support the integration of sustainability requirements into sourcing and supplier management processes.
- Maintain up-to-date knowledge of sustainability regulations, emerging trends, and best practices to support strategic planning.
- Provide expert guidance on responsible sourcing, sustainability due diligence, and regulatory compliance.
- Contribute to regional strategic planning and the continuous enhancement of sustainability programs.
- Support the ongoing development and improvement of regional sustainability initiatives.

Supplier Sustainability Management & Engagement

- Build and maintain strong relationships with suppliers, purchasing teams, and cross-functional stakeholders to foster collaboration and improve sustainability performance.
- Drive supplier sustainability performance improvements through corrective action plans, capability-building activities, and continuous improvement initiatives.
- Engage suppliers in carbon emissions reporting and reduction activities to support decarbonization targets.
- Promote sustainability awareness and collaboration throughout the supplier network.

Value Chain Risk Management & Compliance

- Conduct Responsible Value Chain (RVC) risk assessments and impact analyses covering labor and human rights, environmental, climate, and governance risks.
- Manage sustainability audit findings and support audit execution where required.
- Ensure compliance with relevant sustainability standards and regulations, including ISO 14001 and SA8000.
- Address and remediate supplier non-compliance incidents in cooperation with internal stakeholders and suppliers.

Sustainability Analytics & Performance Monitoring

- Collect, analyze, and interpret sustainability-related supply chain data.
- Support supplier information collection through sustainability-related RFIs and other assessment tools.
- Identify sustainability risks, trends, and opportunities for performance improvement.
