Sr Controlling Analyst

Your tasks

The Senior Controlling Analyst will be responsible for supporting the company's controlling routines, contributing to the financial processes, issuing management reports, and performing analyses that support decision making. The main objective is to ensure the accuracy of financial information and adherence to the company's established processes and controls.

Ensure agile and responsive support to the business.
Develop scenario simulations and provide high-quality information to support business decision-making.
Proactively identify business opportunities.
Support Business Plan analyses for contracts and investments, including Working Capital and Cash Flow analysis.
Support Business Plan analyses for new products, assessing their feasibility based on product costs, selling prices, investments, and other relevant factors.
Conduct monthly P&L analyses and present the results to the Commercial Head and team.
Perform feasibility analyses and develop simulation tools to support pricing, sales, and Pricing Committee decisions.
Support the preparation and updating of weekly and monthly KPIs and reports.
Update the monthly forecast, covering volume, mix, pricing, commercial policies, and other key drivers.
Explain the main monthly variances between actual results and forecast.
Support business leaders in preparing monthly forecast presentations.
Conduct quarterly results analyses.
Perform ad hoc analyses and simulations, including bridges, risk and opportunity assessments, and volume, price, and mix analyses.
Manage approval processes related to discounts, pricing, accruals, and other commercial actions.
Validate the costs of new materials as part of the approval process.
Support internal compliance processes.
Support the preparation of the five-year strategic plan.
Lead the five-year budgeting process.
