

Functional Safety Manager (m/f/d) Display Solutions - 243669BR

Your tasks

Join our team as a “Functional Safety Manager” and shape the future of premium automotive interior design!

You'll be the mastermind behind functional safety of cutting-edge display products. Be part of an innovative and motivated team that turns ideas into reality. Connecting all involved disciplines and stakeholders to bring high-end electrical modules, premium appearance mechanical parts, state-of-the-art display panels and agile software as pioneering products to life. You're the technical interface to the customer during acquisition and development phase for all architectural subjects.

You are the central node, internal and external, during acquisition and development phase for all functional safety related topics.

Let's shape the future together!

Your profile

- University degree in the field of information technology, engineering, natural sciences or a comparable qualification
- Experience with FMEA or FTA
- Advanced knowledge of ISO 26262
- First experience with the automotive development process
- Fluent German and English language skills
- Technology enthusiast
- Problem-solving mindset
- Very good communication skills

Would be an advantage:

- Relevant years of experience in a technical area
- Knowledge and experience in ASPICE
- Good understanding of system engineering (product interfaces)
- Knowledge of product components (software, electronics, mechanics, displays)
- Expertise in development process for automotive products (disciplines, test, integration and production)
- Planning and organization
- Capability to take initiative

Applications from severely handicapped people are welcome.

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

Our business unit “User Experience (UX)” ensures that drivers and passengers are optimally informed and being able to control functions in a user-friendly way. Developing solutions from instrument clusters, head-up displays and displays solutions, through control panels, central input devices, and morphing controls, UX makes the processing and management of information easy, intuitive, and reliable.
