(Senior) Project Engineer

Vos activités

We are looking for a highly motivated **Project Engineer** (Manufacturing Technology) to support the development, optimization and implementation of advanced manufacturing technologies across our global tire production network.

In this role, you will drive engineering projects, collaborate with international teams, and contribute to innovative solutions that enhance efficiency, automation and sustainability in manufacturing.

Key responsibilities:

- Develop, standardize and implement innovative manufacturing technologies for tire production;
- Scout and evaluate new equipment, processes, AI, machine vision and data-driven solutions;
- Develop and implement new machine concepts, modifications, upgrades and intelligent manufacturing solutions;
- Lead technical projects from concept through commissioning, ramp-up and global rollout;
- Drive continuous improvement regarding safety, quality, productivity, reliability, sustainability and cost efficiency;
- Collaborate with international plants, suppliers and internal stakeholders and share technical knowledge across the organization.

Votre profil

- Degree in Engineering, such as Mechanical, Electrical, Mechatronics, Process or Software Engineering;
- Experience in manufacturing equipment development, implementation, commissioning and ramp-up;
- Understanding of AI, machine learning, data analytics and their applications in manufacturing;
- Project management and structured problem-solving skills;
- Strong communication skills;
- Advanced English skills (verbal and written);
- Experience working in international and interdisciplinary teams;
- Proactive mindset with strong ownership, collaboration, innovation and continuous improvement orientation.

Notre offre

Our Offer:

- Integration in a challenging and international work environment;
- Flexible working model;
- Collaborative working style;
- Continuous opportunities for the promotion of talent and training;
