Senior BPM Solution Consultant

Vaše náplň práce

- Design, develop, and enrich Business Process Management (BPM) solutions based on requirements from internal business partners using technologies such as **Appian, Pega** and other modern BPM platforms and connecting external IT system with BPM solution using standard integration technologies.
- Develop IT concepts and implement seamless integration solutions across complex, end-to-end manufacturing processes supported by multiple interconnected IT services.
- Drive the digitalization of manual manufacturing processes to improve efficiency, transparency, and data quality.
- Administer, maintain, and support BPM solutions deployed across Continental's global tire manufacturing plants.
- Collaborate with international stakeholders to plan and execute the rollout of new features, applications, and systems in tire plants worldwide.
- Work on challenging and diverse projects within a highly international and multicultural team spanning seven global locations.
- Define, review, and continuously optimize system architectures to ensure scalability, reliability, and long-term sustainability

Váš profil

- Minimum **5+ years of hands-on experience as a professional software developer** working with BPM platforms such as **Appian, Pega, or similar low-code/process automation technologies**.
- Strong understanding of **integrating BPM platforms with external IT systems** using modern integration technologies and standards such as **SOA, REST APIs, web services, and middleware solutions**.
- Solid knowledge of **business process discovery, analysis, and documentation**, particularly for complex end-to-end manufacturing or enterprise processes spanning multiple systems and stakeholders.
- **Bachelor's or Master's degree in information technology**, Computer Science, Software Engineering, or a related field.
