

Maintenance Multi Craft Technician

Your tasks

The Multi-Craft Technician will safely perform all necessary duties and responsibilities relative to general maintenance and electrical repair of machines, equipment, Powerhouse, buildings and grounds, inclusive of but not limited to the following:

- Troubleshooting, repair and preventative maintenance of machines
- Constructing, installing, maintaining and removing all types of machinery and equipment used as a part of or a supplement to the plant operations.
- Machine shop work, tooling, pipefitting, mechanical work, carpentry work, sheet metal work, and rigging. Multicraft Technicians are required to furnish their own basic hand tools.
- Conduct inspections, preventative maintenance, repair, spill containment, clean up, and recordkeeping of environmental systems.
- Performing basic structural welding tasks as needed.
- Perform all the necessary duties and responsibilities related to lubrication of machines, equipment, vehicles, and buildings on plant grounds. This consists of, but is not limited to the following: changing or applying oils, greases or compounds in the above-mentioned areas to reduce friction and prolong life of moving parts; cleaning and changing oil filters; servicing air line lubrication and filtering equipment; cleaning both inside and outside of hydraulic units and oil reservoirs; taking oil samples; and repairing any minor miscellaneous leaks found on equipment while servicing.
- Establish lubrication routes and know proper lubricant, amount, and attention required at each location.
- Maintaining a complete oiling and lubrication schedule as directed by supervision.
- Multicraft Technicians will also be responsible for all centrifuging and filtering operations that include moving, setting up, operating, and cleaning the centrifuge and filters, as directed by supervision.
- Multicraft Technicians will report to supervision any need for supplies and any unusual conditions that exist during the workday.
- Multicraft Technicians may also be required to drive company vehicles on plant property. They are responsible for handling the necessary paperwork, keeping their work area clean and notifying Supervision of any problems encountered in their operation.
- Assist in safety and fire prevention inspections as well as incipient fire control as necessary
- Responsible for performing all job duties in accordance with ContiTech's environmental policy and applicable work instructions. Monitor process and machine parameters during critical belt runs.
- Troubleshoot machine malfunctions using PLC techniques and will be able to improve plant processes through PLC program modifications.
- Troubleshoot AC and DC controls including changing of fuses, coils, contacts, and relays.
- Audit machine set points and process parameters for performance to

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2020, Continental generated sales of €37.7 billion and currently employs more than 192,000 people in 58 countries and markets. On October 8, 2021, the company celebrated its 150th anniversary. The ContiTech business area focuses on smart and sustainable solutions beyond rubber and develops digital and intelligent solutions in future-

oriented sectors. In doing so, ContiTech draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services. The products, systems and solutions developed by ContiTech are used both in the automotive industry as well as in railway engineering, machine and plant construction, mining, agriculture and other important sectors of the future.
