Embedded Software Development Intern

Responsabilități

- Analyze and provide technical and effort estimations for internal and customer requirements,

基于内外部的客户需求，分析并提供相应工作量

- Prepare software high level and detail design specification for assigned features,

为相应的功能完成软件该要设计和详细设计

- Implement (SW coding) assigned SW modules based on SW architectures & coding guidelines

根据软件架构和代码规则实施软件实现

- Create and execute project-specific tests,

创建和执行相关的测试

- Follow company standards applicable in all SW development phases (requirements, specifications, tests, validations, reviews),

在软件开发的阶段遵循公司的相关标准及要求

- Cooperate with international development teams and synchronize with our internal customers

与国际项目开发团队有良好的合作

Cerințe

- Bachelor's degree or higher in Automatic Control and Computer Science, Electronics and Telecommunication, Informatics, Electrical Engineering, etc.

自动控制、计算机科学、电子类相关专业的本科及以上学位

- Knowledge of software, C/C++ programming,

掌握C/C++编程语言

- It is an advantage if you know a model based development language like Matlab Simulink

了解一些高级开发语言(如Matlab Simulink)

- Knowledge in microcontrollers,

至少熟悉一种微处理器

- Development processes basic know-how (V-Cycle),

Job ID
REF1851D

Domeniul de activitate
Wu Hu Shi

Persoana de contact
Huimin Chen

Persoană juridică
Continental Automotive Interior Wuhu Co., Ltd.

具备基本的开发流程(比如V模型)知识

- Basic knowledge of hardware,

了解基本的硬件设计

- Good writing, reading, and speaking English skills,

良好的英语听说读写

- Capability to analyze technical problems,

了解分析问题的方法

- Good communication skills.

良好的沟通技能
