

IT Specialist for AI & Data Engineering Applications (TM)

Responsabilități

The position holder will be an IT specialist of the operations and development team of our upcoming service portfolio around AI & data engineering services.

Your responsibility in this position will be to develop, set up and manage the environment for AI & data engineering applications. Additionally, you will implement improvements and respond to incidents in an agile environment. You will coordinate your work together with the service owner, product owner and the service team to ensure reliable service delivery to our internal customers within central functions and the Automotive business areas.

Furthermore, you will consult customers on efficient usage of the provided services, contribute improvement suggestions and implement them to establish technically reliable solutions that are standardized across all business areas.

Your key responsibilities are:

- Implementation and operation of cloud-native technologies (Infrastructure as Code in e.g. AWS, Azure)
- Continuous improvement and maintenance of the provided solutions for AI & data engineering
- Supporting incident management (3rd level support)
- Consulting customers on efficient usage of the provided services
- Collaboration with central functions and business areas to establish standardized solutions
- Contributing globally to the development of solutions to support AI & data engineering.

Despre noi

Continental's Automotive group sector is expected to be listed as independent company "AUMOVIO" in September 2025. With ~93,000 employees worldwide and annual sales of ~€20 billion, we are entering an exciting new era.

AUMOVIO stands for highly developed electronic products and modern

mobility solutions. In addition to its strong market position with innovative sensor solutions, displays, and technologically leading braking and comfort systems, AUMOVIO has significant expertise in software, architecture platforms and assistance systems for the rapidly growing future market of software-defined and autonomous vehicles. Our purpose is clear: to make future mobility safe, exciting, connected, and autonomous.
