

Internship - in the field of Electronic Development for Advanced Driver Assistance Systems (ADAS) - REF2444K

Náplň práce

We are looking for an intern (m/f/diverse) for **at least 6 months** at our Ulm location in the field of hardware development of control units for assisted driving (ADAS Advanced Driver Assistance Systems) **from October 2025**.

Main Tasks include:

- › Support of the development team in various tasks (current day-to-day business)
- › Development of hardware solutions for electronic control units (ECUs) for level 4 automated driving systems
- › Working with Linux based systems (flashing, troubleshooting of existing electrical designs)

Profil kandidáta

Student (m/f/diverse) in the field of electrical engineering, mechatronics, automotive engineering, or comparable courses of study

- › Familiarity with electronic lab equipment such as oscilloscope, multimeter, and soldering station
- › First experience with analog and digital circuit design (e.g., through coursework or projects)
- › Practical experience in the field of hardware development is desirable
- › Programming knowledge is a plus (e.g., Python, C/C++, or embedded systems)
- › Confident handling of MS Office programs
- › Good knowledge of German and very good written and spoken English skills
- › Interest in working in an international team
- › Quick comprehension, analytical thinking, creativity, independent work, high level of commitment and organizational skills both in a team and in independent tasks

Before you submit your application, there are a few things you should keep in mind: We need your current enrollment certificate and your latest transcript of records. Additionally, if applicable, we require a
