Technical Project Leader for HUD Advance Development UX (TM)

Your tasks
You are responsible for:

- The delivery of a functional and validated technical system
- Representation of all technical disciplines including System Engineering roles (Requirements Engineer, Product Architect, Product Integrator and probably Functional Safety Manager)
- Coordination, Monitoring and Control of tasks, inside the technical disciplines (Hardware, Software, Mechanic, Optic and Test), related to the product development and industrialization and respectively for the assigned complex development projects
- Responsible for the technical part of the Project Schedule
- Coordinate timing plans to achieve the project milestones / phases
- Consolidate the compiled results of the technical disciplines and presentation of the same with the Project Manager to the customer
- Regular reporting of the project status within the Project Team Meetings (internal/external) and Management Meetings (internal/external)
- Primary contact person for technical problems and questions for the customer
- Creation of Engineering Release Checklists on System Level (tracking of SE work products/documents)
- Overview of the status from all R&D disciplines
- Responsible for the technical parts during Risk Management activities.
- Support creation of System-FMEA and P-FMEA

A mentor will support you to stepwise take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes, and organization.

Your profile

- Study in Engineering Science (e.g. Electrical Engineering, Mechanical Engineering, Physics, Information Technology or similar);
- Professional experience (>5 years) in leading technical projects, preferably in the Automotive Industry;
- Experienced in Project Management (Problem Solving, Risk Management, Change Management);
- Experienced in Requirement Engineering (DOORS);
- Good knowledge in using MS-Office Tools;
- Very good knowledge in spoken and written English, German is a plus;
- Intercultural competency and assertiveness Capability of Teamwork.

About us

Our group develops Head-up-Displays (HUD's) for a large range of passenger cars (e.g. Mercedes, Ford, Renault, BMW, Volkswagen, Audi etc.), starting from our customer's requirements to serial production of the device.

Find out more about a Head-up-Display following this link: Continental Automotive - Head-Up-Displays (continental-automotive.com)

Do you want to be part of the HUD group? These should spark your interest:

A Head-up Display (HUD) is a projecting system that shows all relevant information for a car driver directly in their line of sight. This is done by projecting light into the driver's eyes, which will perceive a virtual image, containing all this information, in front of the car, overlapped with the road.

Now we start a team who will be involved in new technologies for HUD and who will make the steps forward from new ideas to new concepts and products.
