Material Handler

Your tasks

In order to be a successful Material Handler, a candidate should be able to work with minimal supervision, be proactive and dependable.

A material handler is in charge of storing, moving, and managing materials. This includes maintaining materials for production needs in multiple departments based on production scheduled provided by Supply Chain and/or direct supervisor.

Job Requirements:

- Perform daily tasks of material movements as stated by work orders to the correct plant location.
- Ensure proper batch management guidelines are being followed and the all inventory is pulled FIFO unless otherwise stated.
- Support and unload inbound shipments.
- Ensure accuracy of shipments via paperwork, counts and weights.
- Assist in properly store and put away all received and tested compound, fabric and other raw materials as they deliver.
- Ensure proper safety procedures are being followed.
- Adhere to the standards for slotting raw material as well as the SAP procedures for batch management.
- Perform monthly and quarterly cycle count procedures as set by schedule.
- Keep inventory of wood pallets and chocks and order as needed through Purchasing using Kanban cards.
- Band and load empty pallets to ship back.
- Help load scrap containers.
- Support extruders by taking over compound.
- Perform all cleaning as scheduled provided on the K-cards that is assigned to Material Handler area and/or designated area.
- Other job duties as assigned
