

Design for Manufacturing Display - UX (TM)

Your tasks

What are you going to do?

- Interface between production, R&D and purchasing;
- Support local projects in the industrialization
 - Check proper calibration of measurement equipment in production;
 - Ensure availability of necessary production data for post-processing and analysis (proper format, harmonized labels, access);
 - Align on a proper format for process change labeling for production data.
- Investigation of critical parameters affecting optical performance and tracking of these parameters in production;
- Discussion and alignment of component designs with production;
- Investigation of parameters correlating with failures, countermeasure definition together with corresponding disciplines:
 - Coordinate structured problem-solving activities;
 - Development of early warning algorithms for critical display performance data.
- Troubleshooting, problem solving and implementation of improvements;
- Ensure that Lessons Learned are implemented, regular updates of Product Test Specification, naming standards application;
- Support local plant SQM for R&D specific topics and insuring proper handover from development to series.

Your profile

- You ideally have a solid and consolidated foundation in engineering, mathematics or a comparable education;
- Statistics know-how is needed;
- Product architecture know-how, as well as display and optical know-how is a plus, technical know-how needed;
- Systematic, analytical way of working as well as problem solving skills;
- Team competency, initiative, taking accountability, resilience;
- Strong communication and organizational skills along cross functional teams.

Our offer

Pay for Performance:

- Achievement Bonuses and Rewards;
- Relocation Bonus for non-Timisoara Residents;
- Recommendation Bonuses for new team members;
- Flexibility Program including flexible hours, mobile work and
