

Electrical Test and Validation Engineer

Your tasks

We have a fantastic opportunity for someone to carry out Test and Validation works of Vehicle infotainment related systems. This position is a permanent role held within a luxury automotive customer back in the North west of England.

The duties will include:

- Represent Continental within a luxury vehicle manufacturer R&D team.
- Develop professional relationships across a multi disciplined team.
- Update vehicles to the latest available design release and test function (eg Audio / Lighting / test display)
- Maintain static rigs and dynamic simulators as per project requirements
- Work within supplier engineering methods and processes and support infotainment function owners.
- Understand hardware and software delivery in line with project schedule.
- Complete integration of new releases by the customer onto different vehicle properties.
- Test report generation and presentation of results to customer (OE)
- Technical report generation and release into customers systems and processes.
- Planning, procurement and preparation of vehicle electrical test equipment.
- Vehicle install and testing with data logging equipment.

Your profile

- Electrical Technical Qualification, HND/C, degree or extensive experience.
- Automotive OEM R&D Environment experience preferred
- Automotive Electrical experience essential.
- Automotive Technician experience desirable.

Our offer

What we offer:

- A competitive salary package with annual "Value Sharing Bonus" paid to all employees.
- A generous contributory pension scheme.
- Healthcare cash back scheme.
- 33 Days holiday
- Employee discounts on Continental Tyres and other products.
- Death in service insurance.

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

The Automotive group sector comprises technologies for passive safety, brake, chassis, motion and motion control systems. Innovative solutions for assisted and automated driving, display and operating technologies, as well as audio and camera solutions for the vehicle interior, are also part of the portfolio, as is intelligent information and communication technology for the mobility services of fleet operators and commercial vehicle manufacturers. Comprehensive activities relating to connectivity technologies, vehicle electronics and high-performance computers round off the range of products and services.
