

Senior IT Engineer Network

Vaše náplň práce

For our location in Taguig / Manila we are looking for a Senior IT Engineer Network.

This position works with other members of our Network Engineering Team to ensure the network remains in compliance with best practices, meets internal design criteria and comply with Internal Information Security and Internal Audit specified guidelines.

- Under general supervision, this position will support, maintain, and configure a Global communications infrastructure.
- This position may have other Engineers working under them at times. Past supervisory skills advantageous for this reason.
- Perform day to day engineering and operations tasks on Cisco Identity Service Engine (ISE) to include installation, upgrades, configuration, and troubleshooting.
- Working knowledge of Cisco DNA, a plus.
- Experience with Cisco FMC and Firewalls required.

Váš profil

- Extensive experience working in large-scale data center/LAN environment.
- Experience with planning, implementation and administration of network devices such as, routers, switches, VPN, and firewalls - preferably Cisco based.
- A thorough knowledge of LAN and WLAN architectures and routing protocols, and a thorough working knowledge of Internet protocols and services (TCP/IP, WWW, FTP, TELNET, SSH, SNMP, etc.)
- Working knowledge of TACACS/RADIUS.
- Enhanced knowledge configuring Cisco ISEs.
- In-depth knowledge and extensive hands-on experience with a full range of layer 1-7 technologies and protocols (advanced layer2; redundancy protocols, advanced OSPF, BGP, and other routing protocols, advanced layer4-7 load-balancing, security, content management, and other technologies).
- Working and technical knowledge of VoIP systems.
- Excellent ability to create detailed physical and logical network diagrams and design documents. Advanced knowledge of Visio.
- Familiar with telephony switching services and features, multiple vendors end-user equipment including but not limited to key systems, electronic business equipment, Automatic Call Distributors (ACDs), Universal Call Distributors (UCDs), Integrated Voice Response (IVR) systems, Voice Mail, data networking and emerging technologies.
