

Global Automation Engineer - Electrical Engineering (hybrid)

Your tasks

At **ContiTech** we develop and manufacture cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.

Your Task:

As an **Automation Engineer** you will be joining a truly **global team**, while connected to our **Szeged Plant**. We are currently working on automation projects for production facilities including **planning, programming and commissioning**. You will be supervising projects and offer phases, ensuring professional, on schedule and cost conform performance. **Implementing on various ContiTech locations** you will bring your expertise to our automation projects together with:

- Programming of programmable logic controllers (PLC) and operating panels (HMI)
- Hardware planning, drawing/creating electrical schematics using CAE-systems EPLAN P8
- Writing tender documents and evaluating offers in the field of automation technology
- Creating project and machine documentation
- Optimizing and adjusting control processes due to the customer's demands
- Commissioning of production machines worldwide

Your profile

- University degree in electrical engineering/automation or comparable subjects
- Good PLC programming skills (TIA, STEP7, WINCC)
- Profound knowledge in measuring, controlling and processing technologies
- Confident in using MS-Office applications
- Structured, independent, analytical and goal oriented, precise way of working
- High commitment, quick perception, team player and good communication skills
- High level of written and spoken English (German is a big plus)
- Willingness to travel national and abroad (30%)
