Software Developer for Innovative Over-The-Air SW updates SCT RM (TM)

Your tasks
Join our team in developing complex software solutions addressing the technological challenges of the Over-the-Air update features in the context multi-cored, double-banked automotive-grade micro-controllers.

Job upgrade available…
We are just one loading away from the perfect software! Click Apply now to finalize the process.

Your job upgrade will be completed when:

- You have designed and written your own code in an Agile environment (SCRUM, SAFe);
- Of course... your code needs to work, so you need to review and validate it;
  ..but, how can you be sure that you've done what the customer wants? Analyze and clarify all requirements is the answer.
  If you need help, someone will always be there for you!

Terms:
- SW Loading - Flash/Update the Software for ECUs in the car.

Your profile

- University Degree (Electronics, Computer science or equivalent);
- Advanced embedded C programming, C Coding Guidelines (MISRA standards), good understanding of Micro-controller & Hardware Basics;
- Good knowledge in areas: booting, firmware update, diagnosis;
- Technology: CAN, UDS, SPI, TCP/IP, micro-controllers, flash memory;
