

# Product Management - Conveying Solutions - Special Products

## Descrição da função

As the Product Manager of Conveying Solution - Special Products APAC, you will be responsible for driving product strategy and planning, Internal and External stakeholder management, ensuring the successful development and launch of our products, and developing our special solutions product roadmap.

This position requires a combination of strong strategic thinking and excellent communication skills, and the ability to inspire and motivate relevant stakeholders.

As a PM you will need to know, understand and communicate the Value Proposition and the benefit to purchase case for the products in your portfolio. Special products would primarily included but not limited to pipe belts, engineered products (Flexowell, Sicon, Filter, Cleated belting), agricultural & construction equipment products, amongst others.

## Product Strategy and Planning

- Collaborate with cross-functional teams, including R&D, BD, Innovation Management, MarCom, S/C, Operations and the Segments to develop and execute product strategies aligned with company goals and market trends
- Conduct market research and competitor, and product analysis to identify new product opportunities and make informed decisions
- Define and prioritize product features, enhancements, and releases based on customer needs and business objectives.
- Develop and manage product roadmaps, and the product life cycle, ensuring alignment with overall company strategy and objectives
- Align with Global counterparts to ensure maximum synergies throughout the organization

## Product Development and Launch

- Oversee the end-to-end product development process in conjunction with IM and MarCom from ideation and requirements to development, testing, SOP, and market launch
- Work closely with the Segments, IM, MarCom and the R&D teams to ensure timely and successful delivery of high-quality products
- Collaborate with BD, MarCom and the Segment teams to develop go-to-market strategies, product positioning, and messaging
- Monitor product performance, gather customer feedback, and analyze data to identify areas for improvement and optimize product offerings

## Stakeholder Management

- Strive for win-win outcomes that benefit both the product and its stakeholders. Look for opportunities to create shared value and align
