

## Advanced Purchasing Engineer for AM - PUR (TM)

### 工作职责

- Representing purchasing in the quote and project team from acquisition phase to project SOP and responsible for all material specific topics for the projects of our AM business area;
- Commercial evaluation of the material - BOM (Bill of Material) for all specific products from platform products with accent on understanding of cost drivers;
- Material target achievement: tracking of actual BOM costs versus award BOM (PCIS), definition of countermeasures together with project team and escalation to management of supplier, Category and Segment Management;
- Supporting cost-optimization-concepts in quote and project team for securing commercial targets during development by using technology and supplier benchmark activities and seeking for innovative and competitive supplier ideas, developing and implementing potential value analysis;
- Securing usage of right material components as well of suitable software solutions in BOM (Component Review Meetings) for best competitiveness and material supply;
- Securing sourcing process including milestone tracking, Audit relevant documentation and participation and escalation in project review meeting within the segment;
- Supporting actively cost reduction programs for platform products after SOP by introduction of new components/technologies(re-design to cost and cost& value analysis).
