

# Product Development Engineer

## Your tasks

### THE COMPANY

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.

### THE POSITION

Product Development Conveyor Belts - includes support for all conveyor belt types including engineered products for the agricultural market, service materials and special projects as warranted. The emphasis will be on developing products that meet the requirements of our traditional trough or pipe belt solutions or agricultural solutions while improving the performance of our belts.

- Work with Material Platform / Material Process Engineering to define specifications and test procedures for raw material suppliers (cord, fabric, coating, rubber)
- Assist in the development of new alternative material suppliers and support audit if necessary
- Participate in strategic projects
- Customer acquisition and PD in order to gain new business
- Support global standardization and consolidation of belt and service material specifications
- Contribute to product management activities
- Define DFMEA and product DVP to meet the project requirement book and develop test plans and procedures
- Drive the New Product Developments from G30 to G80
- Technical lead in development projects
- Drive, document and train design standards for the product line
- Systematically analyze own and competitor products, including their product performance and manufacturing process
- Technical experts to train new engineering staff, to help in complaint
