Internship Electrical Engineering for Access and Connectivity projects - AN (TM)

Your tasks

Are you passionate about electronics and want to learn and gain experience in the domain while working in a young and enthusiastic team? Then, this role may fit you.

As a student in our team you will be involved in the process of designing and validating EE architectures for Access/Smart Access and Connectivity (4G/5G) products and take part in the whole product development process, working together with other disciplines like SW, Sys, Quality, TPL, etc.

You will also take responsibility of supporting projects that are already completed and on the production line, performing activities that help the line engineers to keep the process on track.

Your profile

What you will be doing:

- Education / Study preferably in areas of: Electronics (e.g. UPT – EtcTI)
- EE design:
  - Architecture;
  - Schematic;
- BOM (Bill of Materials) with approved components;
- HW/SW interface;
- Working with specific equipment, including RF equipment (such as Spectrum Analyzer, Signal Generator, etc.);
- Define EE test plan, according to EE specs;
- EE validations;
- Prepare reports, review results with experts, propose technical improvement solutions, help fixing bugs;
- DOORS EE requirements introduction;
- Participate in project meetings;
- Synchronize with project responsible and arrange activities to meet project milestones;
- Advanced spoken and written English.

Our offer

- Integration Program in a professional, young & dynamic team;
- A mentor for your learning period;
- Recommendation Bonuses for new team members;
- Flexible working hours for your studies.

Wellbeing:

- Health & Wellness (Private Health Insurance, Life Insurance, Sport
activities etc.);
- Different discounts (glasses, tires, medical, shopping);
- In-house restaurant & coffee corners.

Ready to drive with Continental? Take the first step and fill in the online application.
