

## Senior Technical Project Manager (CGMS/CSMI)

### Vos activités

Responsible for the stabilization project in PLT and the planning and rollout of CGMS in TT relating to the machine integration and engineering to the plant business systems. Administration and coordination in planning, organizing, and implementing of all engineering tasks related to the project. Responsibilities include cost estimating, financial control, project planning and scheduling, design review and contract award. Keep all necessary plant personnel informed on technical project status. Act as a liaison with Central Engineering and Central Purchasing on project coordination and status. Close co-operation with the Mt. Vernon business leader and central team.

1. Work directly with the Business Project Leader for the CGMS stabilization project in PLT and CGMS integration of TT. CGMS was the replacement of SFI/Legacy systems and includes CSMI, CGMS, CGRS integration to production equipment.
2. CR & PO creation, follow up, and forecasting.
3. Technical problem definitions to have proper support.
4. Development of project schedules and ensures timetables, critical paths, and benchmarks are met.
5. Coordinating purchase orders, deliveries, and production start-ups with Production Control.
6. Project capital budget project planning and prioritizing.
7. Ensure communication between all involved parties including but not limited to Engineering, Process, IE, Production, Quality, IT, and Digital Services.
8. Coordination between system integrators, local Digital Services and Maintenance department.
9. Test Center (Pilots, Back Office) coordination, and setup.
