

## PPI Engineer

### あなたの仕事内容

- engineering and implementation of robust and efficient production processes for the manufacturing of specific products according to time schedule;
- definition of production process for cost calculation;
- preparation and continuous updating of the process flow chart and P-FMEA;
- preparation and updating work instruction;
- identification and implementation of product optimization potential (e.g. raw material replacement) in running articles;
- solving proactively quality issues regarding customer complaints and reject rate;
- identification and implementation of technical production processes optimization potential regarding quality, efficiency and capability (i.e. process parameters as e.g. extrusion speed, vulcanization time, cutting speed, etc.) according to standards;

### あなたのプロフィール

- knowledge of rubber material and process;
- process industrialization related technologies, systems, infrastructures, standards and processes;
- problem solving tools and techniques;
