

# Manufacturing Engineer

## Your tasks

### THE POSITION

Are you ready to be at the forefront of cutting-edge projects, driving innovation, and optimizing manufacturing processes? We're seeking a dynamic and results-oriented Manufacturing Engineer to join our team and play a pivotal role in planning and executing equipment and building projects. Job responsibilities include:

- Plan and aggressively pursue equipment and building projects. These projects will include overhauls, upgrades, re-designs, and installations. New and rebuilt equipment must be tracked using Reliability and Maintainability guidelines and techniques from conception to decommissioning.
- Coordinate and provide timely feedback with the Plant Engineering and Production departments, working schedules for emergency repairs, planned repairs, project work, engineering changes, equipment installations, and estimates for downtime length.
- Work with Plant Engineering Staff to lower vendor base by:
  - a. Standardizing components to equipment types by make, model and distributor.
  - b. Specifying standardized components to equipment vendors/rebuilders.
  - c. Specifying the best component available at the best price.
  - d. Composing building and equipment specifications manuals.
- Organize, update, and maintain equipment files, support documents, drawings, and manuals.
- Compose (Electronically or sketched) mechanical prints or 3D models as needed.
- Perform various duties such as engineering design work (CAD), including solid modeling.
- Evaluate machine components that have failed and redesign if necessary.

### WHY YOU SHOULD APPLY

- Immediate Benefits
- Paid Time Off
- Tuition & Employee Discounts
- Annual Bonus
- Employer 401(k) Match
- And more benefits that come with working for a global industry leader!
