Security & Privacy Architect for Smart Mobility (Iasi)

Your tasks
Smart technologies have been part of our everyday lives for a long time - and are now also changing mobility. Connected vehicles that analyze data in real time are easing traffic congestion, especially in urban areas. Sustainable logistics with intelligent solutions for commercial vehicles, fleets and the aftermarket are the key elements of Smart Mobility. With our technologies, we enable seamless networking of the driver and vehicle with the infrastructure, other vehicles, mobile devices and the cloud, so that all road users can access information and services securely at all times.

Do you want to be a Security & Privacy Architect for Smart Mobility (SMY)? These should spark your interest:

- Supporting in the analysis and Identification of weaknesses in vehicle functions with regards to Security & Privacy;
- Responsible for Analyzing requirements and documentation in the scope of Security and Privacy at stakeholder level;
- Responsible for technical solutions to treat identified risks and satisfying project Security & Privacy framework requirements;
- Responsible for developing and reviewing system architecture with regards to Security & Privacy;
- Responsible for elaborating security mechanisms on ECU level as well as discussing dependencies and vehicle level architecture with our customers;
- Responsible for elaborating solutions for both eLinux controllers, AUTOSAR controllers and in the scope of inter-controller communication.

A mentor will support you to gradually take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

Your profile
You can be a perfect match to our team if you have:

- University degree in computer science, electrical engineering or software engineering or equivalent technical discipline;
- Knowledge of security standards - Automotive and Incident Response Management;
- Awareness of automotive architecture (AUTOSAR) and Communication Standards (e.g. CAN / LIN / Ethernet);
- Knowledge of embedded Linux, in the scope of Security & Privacy (best practices, existing solutions);
- Basic programming knowledge (C, C++, MATLAB/ Simulink knowledge);
- Knowledge of development, test and production process in automotive area;
- Good writing, reading and speaking English skills.

Would be a plus:

- Experience with developing projects that apply ISO 21434;
- Knowledge and experience in commercial vehicles architecture;
- Knowledge of diagnostic standards (UDS);
- Previous experience on software development on Linux applications;
- Previous experience on Low-Level Linux Software Development (File System, Drivers, Boot-up sequence);
- Familiar in model-based system development using Tools such as Medini Analyze, IBM Rhapsody, IBM DOORS etc.
