Software Platform Integrator for Autosar Projects for Software and Central Technologies (Iasi)

Your tasks

Within Software and Central Technologies, we aim to impress our customers with innovations, an intelligent software architecture, reusable modules, reference designs and unrivaled expertise in integration. We actively drive partnerships forward, because it is only together that we can achieve sustainable growth and implement the best possible solutions. In addition, we are focused on harmonization and simplification through standardized software and hardware modules, expertise, processes, methods, and tools, nurturing synergies and efficiency as a result.

Do you want to be a Software Platform Integrator for Autosar Projects for Software and Central Technologies (SCT)? These should spark your interest:

- You will participate in the development of an extensive range of products (from High Performance Central ECUs to Sunroof Electronics) for premium car manufacturers;
- As a part of SW team you will develop highly sophisticated solutions for creative projects;
- You will integrate software components from a large number of 3rd party suppliers or develop new applications for our projects;
- In order to reach the greatest results, you will collaborate with a strong international team;
- In the end you will be able to see your results being integrated in the vehicles driven on streets.

A mentor will support you to gradually take over own responsibility after an initial training phase which will familiarize you with our products, tools, processes and organization.

Your profile

You can be a perfect match to our team if you:

- Are fluent in C;
- Have Embedded systems fundamentals;
- Have the ability to understand requirements and derive unit design, implementation and test accordingly;
- Have a good logic and problem solving skills;
- Are able to work in a challenging environment;
- Are good writing, reading and speaking English skills;
- Own a positive attitude and optimism, plus a big smile.

It will be a plus if you have:

- Experience in Service Oriented Architectures;
• Knowledge of debugging technique and ability of using hardware equipment;
• Basic knowledge about production processes for electronic devices;
• Basic knowledge of automotive standards and automotive experience;
• Experience with version control tools and change management methods;
• Knowledge on any of the AUTOSAR stacks or RTE;
• Knowledge on Adaptive AUTOSAR;
• Python knowledge.
