Tire Building Jumper

Your tasks

The Tire Building Jumper must be able to operate all high investment Commercial Radial Truck Tire building equipment for the assembly and placement of all components necessary for the construction of "green" Commercial Radial Truck Tires. The Operator IV must be able to read specs, know all tire components used in the assembly, and effectively communicate with set-up men and supervision. The Jumper also operates jeeps, tuggers, walkies, forklifts and material handling equipment for the purpose of delivering components to the Commercial Truck Tire building machines. They are also responsible for collecting and weighing green waste and collecting scrap components from the tire building machines and returning those to the supplying departments as well as returning empty books/cassettes to their respective departments.

- Load and remove stock cassettes and books
- Make minor machine adjustments to ensure proper stock length and placement
- Complete quality checks on product including material splices, standards, and corrective actions using metric measurements and formula.
- Read specification, use hand tools, tape measures and other gauging devices to monitor current and ongoing product quality.
- Read quickly to equipment downtime or other extraordinary condition, and must notify supervision whenever such conditions occur
- Perform actions with a control panel interface, both automatic and manual
- Execute basic sequencing process on Tire Build machines
- Possess and apply problem solving skills in case of machine cycle issues
- Follow standard practices and perform all work necessary to promptly and accurately obtain quality and quantity production, and keeping work areas neat, clean, and orderly.
- Perform other duties as directed by the Lead Supervisor or Department Manager.
- Must be able to read and understand written and oral instructions as to specs, procedures, tolerances, and various construction and quality requirements
- Communicate with other inbound and outbound operators, production operators, other crew members and supervision.
• Demonstrates the characteristics of 5S to keep work areas neat, clean, aligned, and orderly.

• Follow all plant policies, environmental policies, and plant and departmental safety policies.
