Robotics Software Intern (IDA: 2024-00019)

Your tasks
Intern will be involved in the following activities:

1. Developing and enhancing the perception software.
2. Evaluating machine learning algorithms with different AI accelerator hardware.
3. Conduct thorough testing and debugging on a simulated environment and real robot to ensure the reliability and performance of the software.
4. Document and communicate technical designs, implementation details, and project progress effectively within the team.

Your profile
Solid understanding of software development principles, data structures, and algorithms. Excellent communication and teamwork abilities to collaborate effectively with cross-functional teams. Self-motivated and eager to learn new technologies and techniques in Computer Vision and Robotics.
