

Senior Business Intelligence Specialist

Your tasks

The Senior BI Specialist is responsible for concept, development and implementation of BI solutions based on business requirements by using agile methodology.

Your main responsibilities will be:

- Consult & support business stakeholders in reporting set-up and concepts;
- Transform functional reporting requirements to BI solution;
- Design & model solutions (i.e. create solutions prototypes, design data transformation processes across multiple domains);
- Analyze, design, test, implement cloud based BI solutions;
- Document existing processes, architectures and implementations;
- Manage and coordinate the BI application lifecycle to deploy new developments and changes for the BI service;
- Support SLA-compliant operation of BI solution incl. incidents solving, error tracking and pro-active problem management;
- Challenge existing solutions, processes, technology strategies with novel ideas;
- Assists, mentors, and instructs local lower-level developers and specialists;
- Responsible for training team members, setting strategy and monitoring progress towards goals;
- Be administrative leader for local IT team up to 5 members.

Your profile

To succeed in this role you'd need:

- University degree in Information Technology;
- Comprehensive know-how and at least 3 years experience in:
 - Design and delivering data platforms for Business Intelligence or Data Warehouse,
 - including data ingestion, ETL, data integration and reporting;
 - Implementing cloud-based, scalable Business Intelligence solutions (e.g., delta lake,
 - data lake house);
 - Data Engineering, Business Intelligence and/or analytics projects.
