

PSS Full Stack Developer

Descrição da função

Continental's digital capabilities are growing every day. Our Tires Manufacturing IT Competence Center drives the digitization of our tire plant's processes - and we want you to join us!

We analyze business requirements and transform them into the latest digital processes and systems. This enables Continental's Tire business to continuously improve production performance and quality results in order to meet customer requirements.

We partner with people from our tire plants and other areas within the company to realize new functionalities or test and evaluate new technology. We are a global, highly motivated IT team that has the freedom to act and embraces diverse thoughts and perspectives.

We're setting up a new Tires IT HUB in Bengaluru and you will not only be one of our first team members, but you will be responsible for the future development of the department. If you love to build something new, Continental is the perfect match for you. Join us in this thrilling adventure and shape the team with us.

In this exciting job you work on the following tasks:

- Creating and maintaining IT solutions for the manufacturing process specification and manufacturing tool management including availability, traceability, and validation of manufacturing tools
- Collaborating with a global team in design, develop and rollout
- Supporting and coordinating software change request management process in coordination with all internal stakeholders
- Implementing and coordinating preventive, proactive, reactive operational measures
- Defining and reviewing system architecture and supplier deliverables
- Guiding the development team on issues related to the design, development and rollout of manufacturing IT services

Requisitos

- Academic degree in computer science, another technical field or an equivalent qualification
- Several years of work experience as a professional software developer (preferably in Manufacturing IT)
- Experience in analysis, design, hands-on development and delivery of Microsoft .NET based Web/Windows applications
- Working knowledge of Data Management , Data Modelling / SQL / Database operations
- Comprehensive knowledge of ITIL framework and service operations
- Excellent problem-solving and critical thinking skills
- Intercultural competency
- Open to travel up to 10% worldwide
