

Principal Architect ADAS / Automated Driving (m/w/d) - Executive - REF53368N

Ihre Aufgaben

Join our team as a Principal Architect for our ADAS and AD products in Ulm. In this role you will be shaping our future architectures from vehicle level via system level down to software level. You will be working with a highly skilled global team of system and software architects in an agile environment.

As Principal Architect you will be...

- end to end responsible for the whole architectures including execution in products and projects
- drive the system architectures for all Continental products from SAE Level 0 up to Level 5 in the respective area
- create innovative architectures and work with the hardware and software teams to support our architecture vision
- break down requirements and architectures for the compute platform, radar, camera and lidar as well as algorithm components
- ensure that we deliver modular, scalable and reusable systems across different product categories
- finding yourself in an international and interdisciplinary environment and collaborate intensively with our high-tech industry partners as well as our management

In addition, you will be functionally leading the solution and release train architects.

Ihr Profil

- University degree in Computer Science or comparable subject
- Profound experience with scalable and reusable architectures; as well as experience in the field of Advanced Driver Assistance Systems (ADAS / AD)
- Deep understanding of large scale software products
- Solid understanding of UML, SysML
- Extensive experience working in large, interdisciplinary projects
- Hands on attitude and result orientation, combined with a collaborative way of working
- Challenging existing paradigms
- Willingness to travel (approx. 10%)

Applications from severely handicapped people are welcome.
