

Senior Agile Software Engineer - Sibiu SAM R&D (Sibiu/Craiova)

Responsabilități

We build tomorrow`s technology. We are #peopleofcontinentalsibiu.

We are looking for SW Development Engineers. If you like working in a big, dynamic team and if you want to make a contribution, come and join us!

Check out your future responsibilities below:

Are you aware of the many benefits of an air suspension system? CAirS combines the compressor, valve block, control unit, motor drive/relays, internal pipes and cables, temperature sensor and connectors in a single compact unit, reducing the weight by up to 1.5 kilograms.

This highly integrated air supply system simplifies installation in the vehicle because it comes as a complete unit. It also has a scalable range of functions, allowing it to be used for simple level control or for fully integrated solutions that control all tasks relating to the spring rate and damping. CAirS is a closed system with a pressure reservoir, which means that it is especially quiet and efficient.

If you want to be part of our agile team, please check below your future responsibilities:

- Develop software for embedded systems in the ESS department (CAirS product)
- Analyze and understand software requirements
- Integration of 3rd party AUTOSAR SW components
- Creation of documentation and user manuals for the implemented software solutions
- Writing and implementing efficient code
- Debugging, Analyzing and Testing written code
- Perform measurements and assess the results of the measurements
- Communicates with project team to exchange information and identify improvement opportunities
