

Supply Chain Planner

Vos activités

THE POSITION

- In this role, you ensure the delivery reliability along the total Supply Chain for the plant's article portfolio.
- Demand Planning: Collaborate with sales, marketing, and operations teams to forecast demand for products or services based on historical data, market trends, and upcoming promotions or Launch events.
- Inventory Management: Optimize inventory levels to meet customer demand while minimizing excess or obsolete inventory. Monitor inventory levels, track inventory turns, and coordinate replenishment orders with central CDIM.
- Production Planning: Develop production schedules short and long term and coordinate manufacturing activities to ensure timely production and delivery of products. Balance production capacity with demand forecasts and inventory levels to optimize efficiency.
- Continuous Improvement: Identify opportunities for process improvement within the supply chain, such as reducing lead times, improving forecast accuracy, or optimizing inventory levels. Implement and monitor improvement initiatives to drive efficiency and cost savings.
- Risk Management: Identify potential risks and disruptions within the supply chain, such as supplier shortages and quality issues. Develop contingency plans and mitigation strategies to minimize the impact of disruptions on supply chain operations.
- Data Analysis and Reporting: Analyze supply chain data, such as demand forecasts, inventory levels, and supplier performance metrics, to identify trends, patterns, and areas for improvement. Generate regular reports, act on key performance indicators (KPIs) related to demand forecasting accuracy, forecast bias, inventory levels, and customer service levels. Use KPIs to measure performance, identify areas for improvement, and drive accountability within the organization. to track performance and support decision-making.
- Conduct scenario analysis to evaluate the impact of different factors such as, promotional activities, or supply chain disruptions on demand forecasts. Develop contingency plans and mitigation strategies to address potential risks and uncertainties.
- Collaborate with cross-functional teams, including sales, marketing, operations, finance, and logistics, to align supply chain activities with business goals and objectives. Communicate effectively across departments to ensure coordination and alignment of activities.
- Coordinate order processing and fulfillment activities to ensure on-time delivery to customers. Monitor order status, resolve any issues or delays, and communicate with customers regarding order status updates.
- Scenario Planning: Conduct scenario analysis to evaluate the impact of different factors (such as pricing changes, promotional activities, or
