

Incoming Inspection Engineer

Ihre Aufgaben

- RM inspection for critical Raw Material at receipt stage for material like Carbon, Silica, 6PDD, Wax, ZnO , CBS / TBBS.
- Test Method development for Critical RM testing.
- NIR Test Equipment** will ensure quick and accurate judgement on incoming material Quality (**Decision on procurement to be taken - 104K Euro or 9.4 M INR**).
- To perform the inspection of reinforcement activities as now handed over from MPE team to QA w.e.f 1st March 24.
- Supplier interaction, communication and complaint management.
- Supplier visits for action implementation verification.

Must have good knowledge of Rubbers, Fillers, Rubber Chemicals ,Textiles and steel cords.

Must have knowledge & perform testing of rubber chemical used on rubber industry like Rubber, carbon black, Silica, Oil, accelerators, textile etc.

Good knowledge and experiences of wet chemical analysis.

Must have knowledge of sophisticated analytical testing like FTIR / UV-Vis etc. Also have the capability to interpret the results.

Fabric testing knowledge & releasing.

Steel cord & metal breaker testing knowledge & releasing.

Must have knowledge of test method development and modification as per internal standard.

Knowledge of internal standard like ASTM/ ISO / IS in the field of rubber/polymer is a must.

Must know the common good laboratory practice.

Knowledge of NABL will be added advantage.

Proficient in new test method development and documentation in accordance to IS / ASTM internal standards

Daily report preparation, record updation and fair presentation and communication skills.

Supplier communication and supplier related complaint management.

Structured problem solving - Root Cause analysis and problem solving tools.

Data Analysis.

Rubber mixing knowledge will be added advantage.

Should have knowledge in Rheometer & Mooney viscosity testing.

3rd Party Test according to Annual Layout / COA and Inspection plan
Releasing the GRN of Local and imported parts in SAP system, and decision on lot's tag.

Block Available stock in case of any nonconformance & 100%

Ready to drive with Continental? Take the first step and fill in the online
application.

Über uns

Continental develops pioneering technologies and services for
sustainable and connected mobility of people and their goods. Founded
in 1871, the technology company offers safe, efficient, intelligent and
affordable solutions for vehicles, machines, traffic and transportation. In
2022, Continental generated sales of €39.4 billion and currently
employs around 200,000 people in 57 countries and markets.

The ContiTech group sector develops and manufactures, for example,
cross-material, environmentally friendly and intelligent products and
systems for the automotive industry, railway engineering, mining,
agriculture and other key industries. Guided by the vision of “smart and
sustainable solutions beyond rubber,” the group sector draws on its
long-standing knowledge of the industry and materials to open up new
business opportunities by combining various materials with electronic
components and individual services.
