

# Incoming Inspection Engineer

## Descrição da função

- RM inspection for critical Raw Material at receipt stage for material like Carbon, Silica, 6PDD, Wax, ZnO , CBS / TBBS.

- Test Method development for Critical RM testing.

- NIR Test Equipment** will ensure quick and accurate judgement on incoming material Quality (**Decision on procurement to be taken - 104K Euro or 9.4 M INR**).

- To perform the inspection of reinforcement activities as now handed over from MPE team to QA w.e.f 1st March 24.

- Supplier interaction, communication and complaint management.

- Supplier visits for action implementation verification.

Must have good knowledge of Rubbers, Fillers, Rubber Chemicals ,Tex les and steel cords.

Must have knowledge & perform tes ng of rubber chemical used on rubber industry like Rubber, carbon black, Silica, Oil, accelerators, tex le etc.

Good knowledge and experiences of wet chemical analysis.

Must have knowledge of sophis cated analy cal tes ng like FTIR / UV-Vis etc. Also have the capability to interpret the results.

Fabric tes ng knowledge & releasing.

Steel cord & metal breaker tes ng knowledge & releasing.

Must have knowledge of test method development and modifica on as per interna onal standard.

Knowledge of interna onal standard like ASTM/ ISO / IS in the filed of rubber /polymer is a must.

Must know the common good laboratory prac ce.

Knowledge of NABL will be added advantage.

Proficient in new test method development and documenta on in accordance to IS / ASTM interna onal standards

Daily report prepara on, record upda on and fair presenta on and communica on skills.

Supplier communica on and supplier related complaint management.

Structured problem solving - Root Cause analysis and problem solving tools.

Data Analysis.

Rubber mixing knowledge will be added advantage.

Should have knowledge in Rheometer & Mooney viscosity tes ng.

3rd Party Test according to Annual Layout / COA and Inspec on plan Releasing the GRN of Local and imported parts in SAP system, and decision on lot's tag.

Block Available stock in case of any nonconformance & 100%

## **Quem somos**

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.
