

DevOps Infrastructure Engineer for AN (Iasi)

Feladatok

Within Architecture and Networking, we provide systems, software, services and complete end-to-end solutions for networked mobility in the vehicle and beyond. We develop our innovative solutions along our strategy "Connect.Inform.Integrate." We provide technologies to connect vehicles with the cloud, other vehicles or road users and the infrastructure. From products to services, we protect the connected vehicle by advanced Cyber Security solutions, and we offer solutions for intelligent fleet management.

Do you want to be a DevOps Engineer for Architecture & Networking?

These should spark your interest:

Job consists in being able to understand, maintain, develop and deploy the Infrastructure as Code (both physical and virtual resources) required by projects throughout their development lifecycle. The position is meant for the Infrastructure engineering area.

Inside our DevOps culture, we run by the following 4 engineering areas:

Infrastructure:

- Is defined broadly as a set of information technology components that are the foundation of an IT service; typically physical components (computer and networking hardware and facilities), but also various software and network components.
- Vision Statement: Infrastructure as Code.

Release:

- Is a sub-discipline in software engineering concerned with the compilation, assembly, and delivery of source code into finished products or other software components. Associated with the software release life cycle, release engineering is to software engineering as manufacturing is to an industrial process.
- Vision Statement: Best CD solution and STREAM Self Test.

Monitoring and Observability:

- Observability is achieved when data is made available from within the system that you wish to monitor. Monitoring is the actual task of collecting and displaying this data.
- Vision Statement: UI interface for all STREAM activities.

Ecosystem:

- Is an interdisciplinary field of engineering and engineering management that focuses on how to design, integrate, and manage complex systems throughout their life cycles.
- Vision Statement: Make STREAM CD Platform available for everyone
