

Bachelor Thesis - Product Management - REF55157W

Feladatok

For the area of product management at the Villingen-Schwenningen site, we are offering an opportunity for a bachelor's student (m/f/diverse) to write their mandatory thesis with Continental starting in **September 2024**. The working-hours will be mainly on-site in Villingen-Schwenningen. Remote work is possible according to prior agreement.

The **Bachelor Thesis** will explore the topic of integrating Artificial Intelligence (AI) into fleet management software (VDO Fleet). This project aims to enhance operational efficiency, reduce costs, and improve decision-making processes within fleet operations. The student (m/f/diverse) will support in researching, developing, and proposing innovative AI solutions that can be integrated into our existing fleet management systems.

Get on board, become a part of Continental and also benefit from our Villingen Internship Program (VIP).

Key tasks:

- Conduct research on current AI technologies and their application in fleet management
- Analyze existing fleet management processes to identify areas for improvement through AI integration
- Develop a detailed proposal outlining the scope, objectives, methodology, and expected outcomes of the thesis. This should include a plan for how AI can be integrated into specific aspects of fleet management software, e.g. in vehicle tracking, maintenance scheduling, and fuel consumption optimization.
- Work closely with the product management and development teams to understand the technical architecture of our fleet management software. Propose and prototype AI-driven features or modules that align with the project's goals
- Design and conduct tests to evaluate the effectiveness and efficiency of the proposed AI integrations. This includes setting up benchmarks, analyzing data, and gathering feedback from stakeholders
- Document all research findings, development processes, test results, and analysis in a comprehensive thesis. Prepare and deliver a presentation to company stakeholders, showcasing the project, its findings, and potential impact on the business.
