

# Master Data Analyst

## Descrição da função

The Accounts Payable Analyst is to become the subject matter expert, and technical escalation point who will assist the business in solving complex data related issues. He is also expected to initiate process standardization, and data cleansing activities which will protect data integrity, and global consistency.

## Key Success Factors

- Analyze and resolve complex data related issues and become the technical escalation point of the business
- Responsible for day-to-day operational activities such as account creations, modifications, blocking, deletions, reactivations in accordance with the company's data management work processes and procedures.
- Execute requests from the different stakeholders in Asia related to data cleansing initiatives/harmonization activities provided the necessary documents, and approvals are in place.
- Strict implementation of Continental policies & procedures to achieve global data integrity and consistency.
- Perform compliances checks on business request to ensure quality and accuracy of results.
- Responsible for the timely and proper escalation of incidents/issues/concerns to Team Lead or Service Delivery Manager.
- Provide support or issues and escalations and assist other team members as required.
- Provide support in the overall data management process via training, respond to questions/issues linked to master data, preparation of specific queries on request.
- Perform troubleshooting as needed and rule out discrepancies in the master data set up. If technical issue is unresolved, assist the requestor in escalating to SAP IT/ Central or Local Key user as applicable.
- Support his /her Team Lead or Service Delivery Manager to perform assigned internal compliance activities or to support external audit engagement.
- Support additional activities as may assigned by Team Lead or Service Delivery Manager

## Requisitos

- Graduate of any four year course with bachelor's degree holder in Finance, Engineering, IT or any other related courses.
- 2 - 4 years work related experience in master data activities or related processes (e.g., vendor, materials, customer data, etc.).
