

Application Developer Data Engineering (Product & Vehicle Data)

あなたの仕事内容

Continental's digital capabilities are growing every day. Our eCommerce, Fleet Solutions and Data Science Information Technology team creates a wide range of technology solutions for Continental's Global Sales and Marketing teams - and we want you to join us!

Our team continuously works on the digitalization of our business-to-business processes and end-consumer communication, using leading web technologies and a strong focus on data science and artificial intelligence. We run Continental's global customer relationship management platform, which supports our Sales colleagues in their daily interaction with customers. The Fleet Solutions part of our team builds global tech platforms using the Internet of Things, big data and automated service management. We constantly strive to improve the user experience for our fleet customers and Continental's fleet organization.

If you'd love to join a global team that works on the latest technologies and creates value-added solutions for customers, Continental is the perfect match for you.

Your main responsibilities:

- Technical ownership for product and vehicle data application for SST (single source of truth);
- Development and operation of a modern worldwide data warehouse application;
- Integrating product and vehicle data to create a 360-vehicle fitment view for OE and Replacement data;
- Integration of different data sources for the Data Warehouse application, establishing and operating data access points for internal customers;
- Building data architecture to ensure a consistent and reliable flow of information for SST and fleet data;
- Implementing the right architecture, data structure, business logic, ETL routines, rule sets and interfaces;
- Providing corrective and preventative maintenance including monitoring of system performance and integrity for SST;
- Enabling data integration via reporting tools like Power BI and API;
- Coordinating support, ITSM process, and data quality for SST;
- Creating best practices for data loading and extraction.

あなたのプロフィール

- Academic degree in Computer Science, IT or an equivalent qualification;
- >2 years of work experience in the above-mentioned area;
