Continental

Senior Software Developer C/C++ for Product Line 1 AN (Iasi)

Your tasks

Passionate about automotive Security? You can now make your passions meet in our Architecture and Networking business area.

In the Architecture and Networking (AN) business area, activities ranging from seamless connectivity technologies and vehicle electronics to innovative high-performance computers are brought together. Thus, we provide the entire electronic backbone enabling any functions in the vehicle. Besides the hardware, we connect the vehicle with the cloud and beyond to offer all services optimizing the vehicle architecture. We are setting standards for the connected mobility of tomorrow.

Do you want to be a Software Developer C/C++ for Architecture & Networking (Iasi) ?

These should spark your interest:

· As a software developer in our team, you will create software for innovative high performance computing products by refining specifications, designing the architecture and implementing it;

· We work in cross-domain international teams applying Scaled Agile Framework (SAFe);

· With us, you will experience each software development phase (customer specifications, architecture, design, code, tests and validations);

· You will collaborate with other architects, experienced developers, Integration & Testing colleagues, in order to achieve the right synergies and create efficient and fully functional solutions;

· Achieve ASPICE quality goals, under the guidance of our quality experts;

· Bring your own ideas and contribution to the development of the future automotive products and get the satisfaction to see them integrated in real cars.

Your profile

You can be a perfect match to our team if you:

· Are a graduate of a Technical University (i.e. Computer Science, Informatics, Electronics);

· Have minimum 4 years of relevant experience in the automotive field;

· Have good knowledge of C/C++ programming languages and OOP principles, including design patterns and state machines;
