

Consultant Data Scientist

Your tasks

We are currently seeking a dedicated Consultant Data Scientist to work on the following tasks:

- Operations and maintenance of AI solutions on our Data Science Factory (Python, Java, Kubernetes, Jenkins, Airflow, AWS stack);
- Provide IT service;
- Further development of these solutions in regards to performance, accuracy, cost efficiency and end-to-end supply chain process fit;
- Support in related IT projects.

Your profile

- University degree in Information Technology, Mathematics, Statistics, Physics, Economics, Data Science, or similar qualification;
- Programming skills in object-oriented programming languages (Python, Java, R) and CI/CD (Github, Jenkins);
- Business related experience in advanced analytics methods like data mining, predictive analytics, datamining, machine learning;
- Competency in self-service BI tools like Tableau, Power BI;
- Confident database handling (e.g. PostgreSQL);
- First professional experience in IT projects, ideally with agile/scrum;
- Knowledge of supply chain management processes (beneficial);
- Interest in new technologies;
- Professional working proficiency in English (verbal and written).

About us

Continental's digital capabilities are growing every day. Our Supply Chain Information Technology Competence Center is the digital backbone of our company's Tire business – and we want you to join us!

Our multinational, diverse team of technologists, mathematicians and business pros provides technology solutions to ensure that the more than 140 million tires Continental sells globally every year are produced and end up in the right place at the right time.

The team uses artificial intelligence, machine learning and advanced analytics to forecast customer demand and plan our global tire production. We're ultimately focused on the customer experience and the continuous improvement of our supply chain.

If you love to build new, complex technology and optimize it, Continental is the perfect match for you.
