

C#, .NET8 DevOps Engineer for materialflow and product quality control systems

Your tasks

Continental's digital capabilities are growing every day. Our Tires Manufacturing IT Competence Center drives the digitization of our tire plant's processes - and we want you to join us!

We analyze business requirements and transform them into the latest digital processes and systems. This enables Continental's Tire business to continuously improve production performance and quality results in order to meet customer requirements.

We partner with people from our tire plants and other areas within the company to realize new functionalities or test and evaluate new technology. We are a global, highly motivated IT team that has the freedom to act and embraces diverse thoughts and perspectives.

If you love to create and improve digital solutions and drive them from idea to implementation, Continental is the perfect match for you.

In this exciting job you work on the following tasks:

- Take active role in MCAT activities
- Ensure test case (unit test, integration tests) creation and maintenance for MCAT/Grading system
- Constantly enhance the level of "Automatic testing"
- Streamline Release management process for MCAT/Grading system
- Analyze and implement requirements into our system
- Collaborate on roll-out of features and systems in our tire plants
- Be part of the ITSM (Incidents, Problems, Change requests)
- Adopt agile methodology and support digital transformation
- Assure cybersecurity compliance
- Take part in training of the customer
- Identify opportunities for enhancement and performance improvement of the productive systems and implement projects as required, including change management and implementation of software changes.

Your profile

- Academic degree in IT, computer science or any similar field
- 3 years of programming experience
- Basic database knowledge
- Basic knowledge of IT service management (ITIL)
- Technology stack:
 - C#, .NET8
 - Microsoft SQL Server
 - GitHub
 - CI/CD, Jenkins, Octopus
