

Central Key User SAP-SD

工作职责

SAP is our standard ERP system, which is used for all commercial processes. The SD module within the system covers all sales related functions towards our customers and is used by 13.000 users within the Continental Tire Division, in 55 sales locations.

As a Central Key User (SD) you act as an interface between system end users (business) and our global IT organization. You will act as first contact person for our central and local customers in different organizational units.

Being part of an international, highly engaged, and motivated team, you will work together with colleagues from all over the world on topics, that will essentially shape the digital world of Continental within the next years.

Main responsibilities:

- Participation in upcoming projects in the areas of organizational change management, project management, specification, implementation, and rollout (e.g., S/4 Hana project “Grip4T”);
- Connecting with the regional teams within the Global Sales Solutions team;
- Consulting and participation in other international IT projects to represent the business organization and the SAP SD system;
- Support and advice of decentralized key user organization (local SD key users in the tire sales and plant locations worldwide) in improving and enhancing their processes;
- Specification, evaluation, and approval of change requests to meet customer needs within the strategic orientation of the Tires sector;
- Testing of system enhancements to be approved for the productive SAP SD system;
- Processing of tickets related to system errors or service request in BMC Helix ticketing system;
- Organizing and conducting system trainings for SD key users worldwide incl. documentation in different formats (OneNote, PowerPoint, video etc.);
- Maintenance and enhancements of existing business processes after alignment with Sales Management of different markets/regions;
- Key position to coordinate the needs of Tire Sales business worldwide in one ERP system;
- Regular alignment with central key users of other SAP modules, such as Finance, Controlling and Purchasing.
