

(Junior) Data Scientist

Vaše náplň práce

At Continental Tires we want to make analytical excellence an integral part of all processes that have impact on leveraging business value. In cooperation with our domain experts from the Business units we identify business problems which can be supported and solved by using methods from Advanced Analytics and Artificial Intelligence. Only with data insights we will be able to adapt to changes and mitigate risks in a constantly changing economy.

As Data Scientist you will work in a global team of experts delivering Data Science products and know-how to diverse areas all over the tire business.

If you'd love to join a global team that works on the latest technologies and creates value-added solutions for customers, Continental is the perfect match for you.

Your main responsibilities will be:

- Be integral part of projects in an area of specialization like Sales, Marketing or Manufacturing;
- Work with domain experts to understand their problems and solve them with data;
- Understand the Continental Tires data landscape with its diverse applications and architectures;
- Be a partner in connecting the necessary experts from business and IT to solve problems;
- Get involved into different tasks at once and involve yourself with our team to get the support you need;
- Support in shaping the processes and organization to leverage the business value Data Science can bring to our enterprise.

Váš profil

- Academic degree in Computer Science, Data Science, or similar studies;
- Minimum 1 year of IT or industry working experience;
- Good knowledge of Machine Learning, Artificial Intelligence and Statistics;
- Expertise in programming data science use cases with a widespread programming language from the community (e.g., Python, R);
- Experience with data extraction from diverse sources like common data bases, streaming, APIs or SAP systems;
- Reliable team player with structured self-organized workstyle;
- Knowledge on data management, data engineering and data visualization (is a plus);
- Good knowledge of data intensive IT architectures;
- Very good communication skills;
- Experience with Agile methodologies;
