

IT specialist - Test Manager

Your tasks

- Management of the test and release process of our manufacturing apps
- Cooperation with other team members in the global team to create and design testing strategies
- Enhancement of automatic testing framework
- Analysis of the test results
- Definition and evaluation of QA metrics and acceptance criteria
- Responsibility and management of testing environment and data sets
- Mentoring colleagues in software testing
- Interesting and diverse development work in an international multicultural team in 6 locations around the globe
- Opportunity to travel globally
-

Your profile

- Good communication skills, as communication is key to the success of our projects
- A proactive approach to work and colleagues - we like people who are not afraid to take initiative and be creative
- Ability to communicate in English - working with an international team is our daily reality
- **It would be great if you have experience:**
 - With programming simple applications or automated tests
 - With informal team management
 - Although it is not essential, we take advantage of experience with agile development/DevOps/project management and/or other tools used in SW development and testing (MS SQL, JENKINS, GitHub, JIRA, GIT, DOCKER, ...)
