

AI Data Manager

Vaše náplň práce

Our teams develop software solutions for automated parking and safety systems, processing various automotive sensor data and providing a robust, scalable output to driving function modules.

Your Tasks:

- AI Data Manager is responsible for providing the proper quality, quantity and distribution of relevant datasets for the AI projects, focusing on Lane Detection area.
- Collect, consolidate and document data requirements from deep learning / machine learning specialists
- Plan, request, track and facilitate labeling activities in line with project timelines
- Track and communicate the status of the data processing steps in a transparent way
- Prepare and maintain label specification for different machine learning functions
- Review labeling results in line with the label specification and project requirement
- Represent the machine learning projects towards other departments.
