

Streaming Data Engineer

Feladatok

In the Budapest Artificial Intelligence Development Centre of Continental, Autonomous Mobility, we create next generation automotive software solutions which make automated driving safe and affordable. We work towards Vision Zero, a goal to eliminate fatal accidents happening every day on the world's roads. We are looking for creative minds who are passionate to shape the future of automated driving by delivering world-class perception and fusion systems.

Our teams develop software solutions for automated parking and safety systems, processing various automotive sensor data and providing a robust, scalable output to driving function modules.

As Streaming Data DevOps Engineer at Continuous Integration Platform you will be part of an international agile team responsible for the design, implementation and operation of services and solutions which support the analysis of the big data streaming platform and data pipeline.

Your Tasks

- Design, implementation and verification of data analysis solutions with micro services and data pipelines in a cloud infrastructure
- Design and support of service operation
- Stakeholder requirements analysis and work package planning
- Exploration and evaluation of innovative approaches.

Profilja

- Degree in computer science, engineering, information technology, mathematics or comparable areas
- Proficiency in Python, Java including Groovy and spring boot
- Experience in REST API and data serialization approaches (e.g. Protobuf)
- Experience in DevOps, CI/GitOps, service deployment, Kubernetes, monitoring solutions
- Proficiency in data streaming (Apache Kafka & KStream)
- Experience with data pipeline orchestration (Airflow/Dagster/Prefect), Elastic Stack (Elasticsearch/Kibana)
- Good understanding of embedded software development
- Expertise in data analysis and machine-learning methods
- Good command of English language

Nice to have

- Experience working in international agile teams, ideally in SAFe.
