

Manufacturing Manager

Your tasks

- manage and coordinate the production function of the plant/operations unit
- translate plant/operations unit's production strategy into action plans and ensure implementation
- contribute to strategic and operative planning of the plant/operations unit (e.g. with respect to investments, capacity and headcount planning)
- ensure the achievement of production targets according to internal and external customer expectations
- initiate and control investments for production equipment (e.g. production machines, assembly equipment)
- initiate and implement continuous improvement activities by applying CBS methods and training measures
- interface to segment, BU or BA functions in order to gather local production requirements and demands and other feedback
- participate in and/or steer global or local production-related and cross-functional projects
- conduct employee dialogues, personnel development and coaching
- prepare, review and manage the budget and forecast of production cost centers
- ensure timely submission of financial data to controlling
- implement and conduct activities according to the budget established
- ensure that the financial goals are met
- ensure planning of all production processes, equipment and employee resources taking into account customer demand and available capacity
- ensure the fulfillment on the daily and monthly production plan and corrective actions with relevant departments
- contribute to regular production planning and control processes (especially in close cooperation with supply chain function of plant/operations unit)
- ensure operation of all production and rework processes and equipment (e.g. mixing, calendaring, extruding, making-up, pressing, vulcanization, assembly, etc.) according to standards and planning in close cooperation with maintenance (manufacturing engineering / facility management)
- ensure operation of in-process quality control and final inspection according to standards and planning
- improve and follow up regularly on quality and losses with relevant departments
- ensure operation of internal material handling and transportation (internal logistic) for semi-finished goods (raw materials and finished goods are excluded) according to standards and planning
- ensure production data acquisition (e.g. order, machine, process or quality data) according to standards
- ensures compliance with requirements regarding ESH
- operate shop floor training management (i.e. education and training of variable staff for production, logistics and maintenance processes)
- ensure the availability of qualified employees for the production function in cooperation with plant HR
- initiate and control the continuous qualification of production

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2021, Continental generated sales of €33.8 billion and currently employs more than 190,000 people in 58 countries and markets. On October 8, 2021, the company celebrated its 150th anniversary. The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.
