

Cloud Architect (AWS)

Your tasks

Continental's digital capabilities are growing every day. A young team of dedicated and passionate professionals, Tires Cloud Practice, is pushing the frontier of what's possible to ensure information flows even more smoothly to Continental teams and customers around the globe.

The international team operates with an open mind, trust and a healthy sense of humor. If this sounds like you, and if you love to be at the forefront of technology, creating modern cloud-based solutions, then Tires Cloud Practice and Continental are the perfect match for you.

Joining our ranks as a Cloud Architect (AWS), you'll play a critical role in pushing the frontier of what's possible to deliver to our customers using cloud services. In this exciting role, you'll be responsible for:

- Designing and modernizing the landscape of existing cloud architectures;
- Shaping recommended practices and guidelines with our internal customers;
- Working together with peering IT teams and their business counterparts to further drive the adoption of the cloud at Continental and generate business value;
- Collaborating with the infrastructure teams to express the needs of our customers;
- Making sure we're consuming the right cloud services for the use cases;
- Optimizing overall cloud spend.

Your profile

- University degree in Computer Science, Software Engineering, or other related field;
- >2 years of professional software development experience, showcased by a portfolio of previous work;
- Previous experience in designing, building and maintaining applications in the AWS cloud;
- Previous experience in a customer facing role;
- Experience programming with at least one high-level programming language (preferably Python or TypeScript);
- Solid knowledge of Infrastructure as Code tooling, e.g. AWS CDK or Terraform;
- Strong communication skills and ability to work in a fast-paced environment, with a team-oriented attitude;
- Professional working proficiency in English.
