

Head of Plant Management

Your tasks

derive the plant strategy from higher level strategic targets, in order to ensure the expectations of the customer and the profit of the company
prepare the plant and its employees to meet requirements (internal and external)

plan, optimize and control all activities in order to perform the following tasks

- fulfill the market/customer requirements
- improve plant cost structure (fix and variable)
- agree on adjusted targets with the BU in case of major deviation to the budget (sales drop, product mix changes, etc.)
- evaluate and define activities to achieve or improve the financial and operational business goals
- review and authorize e-CR, e-PR and purchase orders (if applicable also for an operations unit)
- evaluate and define actions to meet financial variations related to scrap, manufacturing and price
- coordinate strategies to improve inventory changes and minimize inventory
- ensure compliance with legal regulations (e.g. working hours, environment protection) and internal rules and procedures

- align the plant and customer interfaces
- implement efficient organization structures, procedures and processes according to BU, divisional or corporate standards
- ensure high performance production processes with respect to KPIs (e.g. CT standard KPIs such as routing accuracy, process performance rate, delivery performance internal, manufacturing inventory valuations, overall equipment effectiveness)
- ensure high performance supply chain processes with respect to KPIs (e.g. CT standard KPIs such as delivery performance internal, manufacturing inventory valuations)
- ensure balancing between short-term customer requirements and unplanned occurrences within the operations unit in order to obtain the optimal load and achieve the maximum customer satisfaction (on-time deliveries)

- ensure manufacturability of products within the defined responsibilities on the basis of authorized budgets within the constraints of quality, quantity, delivering and cost goals
- supervise, support and control ramp-up and ramp-down projects within plant
- ensure capable production processes and equipment with respect to KPIs (e.g. CT standard KPIs such as routing accuracy, process performance rate, overall equipment effectiveness)

- ensure quality of components, processes and products in order to fulfill internal and customer targets
